

Air Fleet

QinetiQ's Air Fleet provides a comprehensive and competitive aviation capability to our customers through the LTPA.

We offer a varied fleet of aircraft, modified with flight test instrumentation to support equipment flight test, chase flying, target activities and test pilot training.

The fleet includes:

Fast Jets such as the Alpha Jet and Hawk – used for Test Pilot and Continuation Training, trials and chase work

Light Aircraft such as the DA-42 and Tucano – used for test and evaluation of airborne systems, trials support and photo chase

Rotary Wing Aircraft such as A109E and Gazelle – used for Continuation Training, Night Vision testing and trials support

Heavy Platforms such as the RJ70 and RJ100 – used for Continuation Training, Test Pilot and Flight Test Engineer Training

Providing comprehensive and competitive aviation capability
