

Defence Simulation Centre

The Defence Simulation Centre (DSC) Capability Development Centre (CDC) is facilitated by QinetiQ at MOD Boscombe Down and delivers simulation as a core training component.

The Centre provides a focus point for all modelling and simulation across Defence, allowing for more efficient, cost-effective and environmentally sustainable training.

Providing analysis and experimentation capability to understand how simulation can be used to enhance the training experience, the DSC provides a centre for the MOD and industry to jointly develop training capabilities and enable cost savings across existing training & equipment programmes.
